Editorial

At its recent meeting, the Committee of the Irish Mathematical Society decided that the Newsletter will be published three times each year; at the end of the months of March, September and December. The March and December issues will be available at the Mathematical Symposia in the Dublin Institute for Advanced Studies. It is hoped that the regular appearance and good quality printing will encourage members to write articles for the various sections of the Newsletter.

In the next issue there will be a new section on the History of Mathematics. I believe that there is a particular need to record the contributions of Mathematicians who were Irish or who worked in Ireland, so articles detailing these activities will be particularly welcome.

I would like to thank Ms. Una Sheehan for the typing of recent issues of the Newsletter.

D. Hurley
