

### **1S3 Tutorial 3**

This week is aimed at furthering their knowledge of html by exploring various websites and resources on the internet. Also, this week should be a 'catch-up' week for anyone who has fallen behind.

If they are creating a new web-page, or saving images to their **www** directory, remember that they will need to **chmod o+r** whatever is saved.

Get them to open firefox again using the **firefox&** command, and then direct them to various online HTML tutorials. They may wish to change the following things:

- 1) The background.
- 2) The fonts used.
- 3) The images used.
- 4) The icon used.
- 5) The spiel that they wrote about themselves.
- 6) The size of the font used.
- 7) Something else.

Useful links:

- 1) <http://www.w3schools.com/html/default.asp> - HTML online tutorial.
- 2) <http://www.davesite.com/webstation/html/> - HTML online tutorial.
- 3) [http://www.webmonkey.com/webmonkey/reference/html\\_cheatsheet/](http://www.webmonkey.com/webmonkey/reference/html_cheatsheet/) - explains the various HTML tags.
- 4) <http://www.oswd.org/> - open source web designs.
- 5) <http://www.google.ie/> - if they don't know something (in this case how to change a background colour), a simple way of finding out would be by entering into google.ie the following:

**“html background color”**

And then several pages come up with solutions.
