

## Phase transitions in dense 2-color QCD with Wilson fermions

**Presenter: Simon Hands**

*Simon Hands, Seyong Kim, Jon-Ivar Skullerud*

Abstract: We present results from simulations of 2-color QCD with  $N_f = 2$  Wilson fermions at non-zero  $\mu$  and diquark source  $j$ . We focus in particular on the chiral and deconfinement transitions at large  $\mu$ .
