

School of Mathematics

Course **2S2 Mathematics for Science Students** <http://www.maths.tcd.ie/~saram/2S2/> 2000-01

(SF Students of Mathematics as a whole subject within the Natural Science Moderatorships)

Lecturer: Dr. S. McMurry

Requirements/prerequisites: none (except 1S)

Duration: 24 weeks

Number of lectures per week: 2.5, including one tutorial every two weeks

Assessment: Corrected exercises contribute 10% of the final mark.

End-of-year Examination: A three hour final examination held in June covers the entire course. A 3 hour supplemental examination also covers the entire course.

Description:

- Fourier Analysis
Kreysig: Chapter 10 (Fourier Series and Fourier Transforms)
- Ordinary Differential Equations with Applications, Special Functions, Introduction to Partial Differential Equations
Kreysig: from Chapters 1-4 (excluding parts already covered in 1S2); Chapter 11, 11.1–11.3.
- Linear Algebra with Applications
Anton & Rorres: Review of Chapter 1 (systems of Linear Equations and Matrices); Chapter 2 (Determinants); Chapter 4 (Euclidean vector spaces); Chapter 5 (General vector spaces — simple treatment); Chapter 6 (Inner product spaces — 6.1, 6.2, 6.4); Chapter 7 (Eigenvalues and eigenvectors). Applications.
