Home Work N:

Name: _____

Date submitted (DD/MM): _____

# of task	1	2	3	4	5	6	7	8	9	10	11	12	13	14	15	16	Total mark
Mark																X	

- If you did not attempt to solve certain task, please facilitate the life of a reviewer and cross the corresponding Box above, as shown on the example of 16th subtask.

- **Staple** all tasks of the same Home Work together, under the same cover page. **Do not** staple **different Home Works** together!! Submit each of them separately, with separate cover.

- Though it is desirable that you print and use this template, it is also accepted to draw a similar table by hand, but it should be on a separate empty sheet of paper (it will be used to write down comments).

- If the task is to compute explicit expression (e.g. find Hamiltonian), please write the answer *at the beginning* of the solution. Do not force a reviewer to chase your final formula.

- If the answer is wrong, even if this is a minus forgotten, you get 0 for the task (or a fraction of the task if there are several expressions to derive). If the answer is correct, the mark will depend on whether you demonstrated your ability to derive it. In either case, the reviewer will look on your derivation and leave comments when necessary. If not too technical, comments will be put on this cover page.
